Roadmap

1. Find someone who has problem
2. Receive the problem.
3. How to present the problem, the solution, and your process of thoughts
4. Describe the problem and the approach on it.
    - Problem: …
    - Approach: What do you want to deliver? First thoughts on a concept what should it be able to do, which should be feasible to code?
    - some ideas how it could look like (drafts)
5. Start the work on the project and learn new things try to do all as much as possible
6. Answer the given questions.
7. Reflection
    - How could you improve your project?
    - What did u learn during the three weeks
    - How was the process going?
8. Revise everything you want to send.
9. Send your solution
